Rene Industries Limited
A Milestone to Golden Health

Introduction

Rene Industries Ltd. is a Local pharmaceutical company based in Kampala, Uganda. The company is dedicated to the Development, Production and Sale of high quality generic and branded products. Rene Industries was established in 1998 and currently holds the leading market position in the sector. The company employs over 400 employees at its various facilities.

The factory manufactures various Non-Beta Lactam & Beta Lactam dosage forms including: Tablets, Capsules Liquid orals, Dry syrup, Dry Powder Sachets and External preparations. Currently manufacturing over 110 products, covering over 22 therapeutic ranges.

The design highlight of the unit includes the unidirectional men & material flow pattern. Management firmly believes in continuous improvement in product development required for market. This unit is managed by experienced, qualified, skilled persons and has a highly trained work force who ensure the day-day operations are run as per set guidelines and SOP's.

The Pharmaceutical Manufacturing Facility serves the local and export market within East Africa. Currently exporting to Rwanda, Burundi, South Sudan and Democratic Republic of Congo.

Buy Uganda, Build Uganda

As part of the GOVERNMENT OF UGANDA initiative “Buy Uganda, Build Uganda” (BUBU), Rene is proud to be at the forefront of this campaign in partnership with the National Drug Authority (NDA) and the Uganda Pharmaceutical Manufacturer’s Association (UPMA) with the latest incentive that has been introduced of 12% Verification fees on 35 essential medicines manufactured in Uganda. Through this, local manufacturers will strive to build a self-sustainable pharmaceutical manufacturing sector, increase employment of Ugandans, save on foreign exchange, support local auxiliary industries, improve access to quality medicines, reduce dependency on importation of essential medicines and increase export potential to the EAC and Sub-Saharan region.

Rene Industries Limited
A Milestone to Golden Health
